

# The History of Anatomy and Medicine

## Objective:

To gain an understanding of the background and history of the medical field through various cultures

## Task:

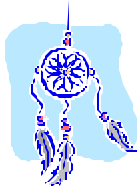

To design a medical history book for children

Each group of students will choose one of the following historical time periods. Each category will be one chapter in the children's book.

Prehistoric Medicine (8000BC – 2000BC)

Asian Medicine (3000BC – present)

Native American Medicine (2000BC – present)

Ancient Egyptian Medicine (2000BC – 400BC)

Greek and Roman Medicine (400BC – 300AD)

Islamic Medicine (700-1500)

Middle Ages in Europe (500-1400)

Renaissance Period (1400-1700)

Turn of the century (1850-1950)

Genetic Revolution (1950-Present)

*Aristotle*

Each group is responsible for completing at least four half-sheets of paper, both front and back. Each of the pages must have content and a relevant picture/graphic.

## Research:

Explore a variety of web sites and history books to find your information. You MUST cite all your sources in a bibliography (in APA format) that is separate from your book pages. Begin with the media center web page dedicated to this project: <http://imc.mbhs.edu/science/anatomy/historyofanatomy.htm>

## Grading:

Group grades will be given based on content and aesthetics. See the rubric below for more details.
